## EMAIL, INSTANT MESSAGE, BLOOMBERG, AND TWITTER SUPERVISORY AND COMPLIANCE

***Email is one of your company's most critical assets – and with corporate email traffic projected to grow 68% between 2009 and 2013***

***Managing and supervising email, instant messages, Bloomberg mail, and Twitter has never been more challenging.***

Effectively supervising employee electronic communications to comply with regulatory requirements is becoming more and more challenging.

Organizations in heavily-regulated industries, such as financial services or government, are obligated to review, supervise and preserve client communications and to produce these messages when necessary.

FINRA-registered organizations have to regularly review their representatives' electronic messages, document these visual inspections, and note any actions that result.

Erado's Supervisory and Compliance service provides a fully automated, feature rich, set of auditing tools designed to replace the arduous supervisory tasks that auditors manually perform and replace them with a fully automated system that reduces workloads including review and notation process time.

Simply put, Erado's automated Supervisory and Compliance service utilizes Erado's deep-scan technology to search email, email attachments, instant messages, Bloomberg mail, and tweets for your organizations defined lexicon, and once found, take the prescribed action specified by your organizations compliance policies. When manual supervision is required the auditor is automatically notified in real-time or near-time.

Features	Benefits
Real time deep scan technology	Supervision of all email and attachments
Instant Message, Bloomberg, Twitter	Supervise all electronic communications from the same easy to use web interface
Automatic notifications	Real-time and near-time review of messages
Single, multiple, bulk supervisory feature	Supervision one or more message at the same time
Quick review	View only the pertinent data and surrounding context without having to viewing the entire message
